Capability

cadWeazle® - Beach and off road vehicles without limits

A revolutionary sense of freedom!

A battery powered vehicle for any kind of difficult terrain far off paved roads and leveled sidewalks:
Ride in and through puddles, beaches, snow, mud flats, deserts or steppes. cadWeazle will prevail where all others fail!

Eco friendly and efficient:
Powerful, splash water protected engines allow for smooth acceleration up to speeds of 3.7 mph (6 km/h). cadWeazle will neither produce emissions nor noise, a truly unrivaled 21st century battery vehicle.

100% license, permit and insurance free in most countries:
cadWeazle can be used by anyone of nearly any age due to its intuitive controls. Please contact your local authorities for detailed information on restrictions and limitations in your country or state.

Ideal distribution of pressure on the ground due to large flexible low-pressure tires:
In fact a pedestrian puts a lot more pressure on the ground than cadWeazle's four balloon wheels.

Convenient joystick controls and freely customizable parameters allow for maximum comfort:
All major control settings can be set according to your preferences. This includes braking characteristics, steering behavior and acceleration rate to only name a few.

Care for a solar power upgrade?
A state-of-the-art solar roof turns your cadWeazle Energy into cadWeazle Solar for even greater range and a noticeable increase in energy efficiency. The panel will also shield you from weather and makes gas guzzlers look ridiculously noncurrent.

No more limits...

...adventure's yours
